All QCD jets
$\varepsilon_B = 10\%$
$\varepsilon_B = 1\%$
(a) 188 classes
(b) 17 classes
(c) 17 classes, mass regression
Fraction of jets
After cut / all
m_{SD} [GeV]
(d)
Jensen-Shannon distance (d_{JS})
QCD efficiency (ε_B)
Random selection, ±1 SD
188 classes
162 classes
43 classes
17 classes
162 classes, mass regression
17 classes, mass regression
